What is a Walkalong Glider?

A walkalong glider is a type of glider that is launched and controlled by walking along with it. They are typically made from lightweight materials such as balsa wood or foam core, and they have a simple design that makes them easy to build and fly.

Walkalong gliders are a great way to learn about the basics of aerodynamics and to experience the thrill of flying. They are also a fun and affordable activity for people of all ages.

What's Inside the Book?

"Build and Pilot Your Own Walkalong Gliders" is divided into three parts:

* Part 1: Getting Started * Part 2: Building Your Gliders * Part 3: Flying Your Gliders

In Part 1, you will learn about the basic principles of aerodynamics and how they apply to walkalong gliders. You will also learn about the different materials that can be used to build gliders, and how to choose the right materials for your project.

In Part 2, you will find detailed instructions for building three different glider models:

* The Beginner Glider: This is a simple and easy-to-build glider that is perfect for beginners. * The Intermediate Glider: This glider is a bit more challenging to build than the Beginner Glider, but it offers better performance. * The Advanced Glider: This glider is the most challenging to build, but it also offers the best performance.

Each glider model is accompanied by clear instructions, detailed diagrams, and inspiring photographs.

In Part 3, you will learn how to launch, fly, and maneuver your gliders. You will also learn how to troubleshoot any problems that you may encounter.
