Turkmenbashy, as the late President Saparmurat Niyazov was known, ruled Turkmenistan from 1991 until his death in 2006. During his reign, he established a cult of personality that permeated every aspect of life in the country. His image was omnipresent, appearing on countless statues, banknotes, and even in the lyrics of the national anthem.

Turkmenbashy's Golden Age was marked by a series of bizarre decrees and customs that transformed Turkmenistan into a parallel universe. He renamed the months of the year after himself and his family, banned the use of the word "bread" in favor of "white gold," and Free Downloaded the construction of a massive gold-plated statue of himself on horseback.

A Day in the Life of a Turkmen Citizen

In Turkmenbashy's Golden Age, daily life for the average citizen was a surreal and often absurd experience. Here is a glimpse into the daily

routine of a Turkmen citizen during this extraordinary period:

Morning

The day began with the sound of the national anthem blaring from loudspeakers throughout the capital city of Ashgabat. Every citizen was required to stand at attention and sing the anthem, even if they were in the middle of the street.

Breakfast typically consisted of "white gold" (bread) with tea. Turkmen citizens were encouraged to drink copious amounts of tea, as it was believed to have healing properties.

Afternoon

Most citizens worked in government-owned businesses or in the cotton fields. The workday was long and arduous, but there was little opportunity for advancement or personal growth.

Lunchtime was a simple affair, often consisting of leftovers from breakfast or a bowl of soup. Turkmen citizens were expected to eat quickly and return to work.

Evening

After work, many citizens would gather in the park to listen to traditional Turkmen music or watch propaganda films. Turkmenbashy's image was constantly present, even in these leisure activities.

Dinner was typically a hearty meal of meat and rice. Turkmen citizens were expected to eat together as a family, and it was considered disrespectful to leave any food on one's plate.

Night

As the sun set, the city of Ashgabat transformed into a surreal dreamscape. The streets were illuminated by thousands of golden lights, and the air was filled with the sound of music and laughter.

Turkmen citizens were encouraged to enjoy themselves, but they were also expected to be mindful of their behavior. Alcohol consumption was discouraged, and it was forbidden to criticize the government or Turkmenbashy.

The End of an Era

Turkmenbashy's Golden Age came to an end with his death in 2006. His successor, Gurbanguly Berdymukhamedov, has gradually dismantled some of the more bizarre aspects of Turkmen society, but the country remains an enigmatic and authoritarian state.

Daily life in Turkmenistan today is still heavily influenced by the legacy of Turkmenbashy. His image is still present in public spaces, and his teachings are still taught in schools. However, the country is slowly opening up to the outside world, and it is possible that one day Turkmenistan will become a more normal and less surreal place.

Daily life in Turkmenbashy's Golden Age was a surreal and often bizarre experience for the average citizen. The country was ruled by an eccentric leader who created a parallel universe of his own making. However, despite the absurdity of the Golden Age, it is important to remember that it was also a time of great hardship for many Turkmen citizens.

Today, Turkmenistan is a country in transition. The legacy of Turkmenbashy is still present, but the country is slowly opening up to the outside world. It is possible that one day Turkmenistan will become a more normal and less surreal place, but it is also possible that the country will continue to be an enigma for years to come.
