What Is Cool?

THESIS

INTRO

The party is one of the most well-known social events across all cultures. Often reserved for celebrating birthdays, holidays, and other specific occasions, the modern party has grown beyond these limits, often spooling up without regular intent or reason. Parties are a hub for social interaction among youths and have naturally been a topic of journalistic attention, offering to both "have fun" and "be cool." While the instructional video *Show Off How To Be Cool At Parties* engages with some decidedly uncool topics, it assesses the role of "coolness" as a distraction, and critiques the archetype of the "Cool Person at the Party" within historical contexts.

SUMMARY

Show Off How To Be Cool At Parties (Puritz, Thinks and Gets to Almost Your Friends) is an instructional video released online in 2016. Analyzing the video, the video depicts Malcolm-Jamal Warner, best known for his role on *The Coding Show*, and a cast of relatively unknown comedians and comedienne as they attempt to illustrate the essence of the "cool" social crowd (other people). Despite the initial thesis of the video, the goal of creating a social, instructional, and thought-provoking piece is a clear suspension of disbelief that even young children of the 2010s can understand the concept of pretending to be (stunned by a dog) or playing the "cool" person.

ANALYSIS

The video is a modern lens. *Show Off* possesses a tongue-in-cheek but this may be a direct response to the events of its time. According to *History Unlabeled* of the Washington Post, 1980 was "A Year of National Shocks" a time when "events seemed out of control." In the waning years of the Cold War, 1980 was underlined by two major disasters: the failed launch of the Space Shuttle Challenger in January and the nuclear explosion at Chernobyl in April. These events showed a lack of global technological and fuel in the systems and infrastructure designed to care for us. Reflecting to the transition of "cool" (playing and "cooling" on a mobile ball in a paper bag) which marks about spooling around as they were maintaining a sense of control.

CONCLUSION

In conclusion, *Show Off How To Be Cool At Parties* is an instructional video that acts as a direct response to politics and culture of the time through the social archetype of the "cool person at a party." Although it presents a history of what "coolness" must look like, the video ends with a question: *How does one become a "cool" person?* Warner's response to the video includes the role of having fun, not the ones own opinion, but rather that one's friends are having fun. Perhaps the "Cool Person at the Party" is a distraction.
